

Audubon Workshop Scholarships Available

by Millie Kriemelmeyer

Southern Maryland Audubon Society raises funds to provide full scholarships to Audubon workshops for teachers, naturalists and environmental educators who work in our service area of Calvert, Charles, St. Mary's and southern Prince George's Counties.

Scholarship winners attend an Audubon camp and workshop on Hog Island, Maine, for one week during summer 2003, learning the natural history of the Maine Coast. Experienced instructors lead field exploration on the island, boat cruises, hikes, slide shows, morning bird walks, evening presentations and discussions, and much more.

Applications for scholarships will be accepted up to March 24, 2003, and should be a letter requesting the scholarship and describing how the knowledge and experience will enhance your teaching. A letter of recommendation from your principal or immediate supervisor should accompany your application letter.

The schedule for camps and workshops will be available in December at <http://www.maineaudubon.org/programs/camps/index.html>. Mail or fax your application and recommendation letter to:

Millie Kriemelmeyer, Education Chair
Southern Maryland Audubon Society
16900 Mattawoman Lane
Waldorf, MD 20601
Fax: 1-301-782-7615

For more information, contact Millie Kriemelmeyer at 301-372-8766 or milliek@radix.net.

Environmental Legislative Issue Forum

by Millie Kriemelmeyer

Mark your calendar and attend the Environmental Legislative Issue Forum on Tuesday, February 18, at the Charlotte Hall Library from 6:30 to 9:00 P.M. The Issue Forum is your opportunity to find out the environmental issues for the 2003 Maryland General Assembly. The legislative issues will be discussed by presenters from the Citizens Campaign for the Environment, which is a coalition of more than 20 environmental organizations working together during the legislative session to pass good environmental bills and stop bad ones. You will learn ways you can help in the legislative process, which includes contacting your legislators, writing letters and emails, phoning, attending hearings, and testifying.

The Maryland Department of Legislative Information Services provides the website on the General Assembly that gives

you with much of the background information you need to advocate: <http://mlis.state.md.us>.

For more information on the Issue Forum, contact; Bob Boxwell, 410-326-2042, x45, bobboxwell@hotmail.com; or Millie Kriemelmeyer, 301-372-8766, milliek@radix.net.

Board Wishes To Expand Contact With Chapter Members Through Internet

by Bruce Metzger

At its meeting on Tuesday, November 26, 2002 the Southern Maryland Audubon Society Board decided that it was time to expand contact with its membership through the use of e-mail and through the chapter's web site. The board would like to be able to post its monthly newsletter - The Osprey - on the web site rather than mail it to all members. Since the costs of printing and mailing the monthly newsletter are the chapter's biggest expense, this action would decrease considerably the chapter's expenses. Also, the board would like to be able to contact its membership more directly, especially in those cases where "rallying the troops" quickly is essential, such as for help with emergency conservation measures or with a concerted membership response to a political issue.

Unfortunately, the chapter has little information concerning its membership's e-mail addresses; also an indicator of membership access to the Internet. Without this information electronic communications with chapter members is virtually impossible. Therefore, you will note in this issue of The Osprey a form which asks for your e-mail address and your capacity to access the Internet and the chapter web site. Please fill in the requested information and mail it to the board or e-mail your responses to Bob Boxwell at bobboxwell@hotmail.com.

The chapter ensures the privacy of all information received from its members.

Please take the time to respond to these questions and add any comments of your own. The more complete information we receive about your preferences the better we can serve the membership. Your cooperation will give the chapter an important tool to accomplish its mission.

What is your e-mail address:

Would you prefer to read the newsletter on line rather than have it mailed? _____

Have you visited the SMAS web site in the last month?
_____ In the last 3 months? _____

Do you find the information posted on the web site helpful and informative? _____

Fort Belvoir Christmas Bird Count Maryland Side
By Carol Ghebelian, Coordinator

Clear weather continued to bless SMAS counters for our 3rd 2002 Christmas Bird Count held on Dec. 29th. Twenty-four field counters and 5 feeder watchers tallied a total of 90 species on the Maryland Side of the Fort Belvoir count circle. This total matched our high of 90 in 1985. Nearly 19,000 individual birds were reported.

Record numbers of Gadwall, American Wigeon, and Northern Pintail were among the 21 species of waterfowl sighted on the Potomac and in the Piscataway, Pomonkey, Mattawoman, and Broad Creeks. Gwen Brewer spotted a Greater White-fronted Goose among the Canada Geese at Piscataway Park. It appears to be lingering in the area most recently found among the geese on the fields at National Colonial Farm. The Greater White-fronted Goose is new to this count, bringing our cumulative species total to 125. Other birds of note were Paul Nistico's Great Egret, apparently wintering at the Piscataway Wastewater

Treatment Plant; Tree Sparrows seen by Paul Nistico and George Wilmot; and Rusty Blackbirds seen by Jean Artes' party at the Mount Aventine Swamp. The Potomac River remains high in Bald Eagle wintering population. Thirty-four were sighted—22 mature, 12 immature. Winter finches were not found; Northern Bobwhite and Red-headed Woodpecker continue to be missing. No other remarkable trends were noted. Our crow population appears to be stable but it will be interesting to see how the West Nile Virus impacted crows and other species on larger census reports.

Thanks to all who made the day so successful.

Patuxent River Christmas Bird Count
by Lisa Lister

Thirty two people braved mid-morning snow flurries to help twitch the highest Pax River Count in its eight year history. One-hundred seven species (topping our previous best of 106 in 1999) and 40,547 individuals, which dwarfed our previous high of 34,085 in 2000 made for a great group effort.

Highlights of the count included count highs in just about every species seen. Canada Geese, Ruddy Duck, European Starling and blackbird sp. All tallied over 4000 individuals with blackbirds topping 7000.

All seven woodpecker species that normally occur in southern Maryland in winter were counted. One lucky group counted all seven at Calvert Cliffs State Park. Four species of owl were noted, the common three plus Short-eared. Other interesting species included a count first of Western Palm Warbler, two Brown Pelicans, a Peregrine Falcon, 19 Bald Eagles and the Kelp Gull still frequenting Sandgates.

Two disturbing trends were noted this year. The number of Mute Swans in the count area has steadily increased over the eight year count. This year was the highest with 101. Also, European Starlings are in staggeringly high numbers with just under 7000.

The group held its tally rally at Boomerangs and plans on continuing that tradition next year. Andy Brown will coordinate both counties. Next year's goal: 110 species.

Point Lookout Christmas Bird Count
by Bob Boxwell

Ten parties comprising 18 individuals participated in the Point Lookout Christmas Bird Count this year. The weather was fairly cooperative and except for a breeze over the water it was actually pleasant out. The birds weren't real

cooperative with around 12,000 individuals counted. We ended up with 104 species with 3 Harlequin Ducks and a Rough-legged Hawk being the highlights.

On a personal note, I find I enjoy things more when I can share them. And actually the counts are in the spirit of the season. You give of your knowledge and experience and you are rewarded with an enthusiasm that is sometimes lacking from *old hands*. It renews your energy and makes you remember why you started birding in the first place. And of course, birds really are cool.

Christmas Count has been a tradition for me for over ten years now. It is a reflective time and one where I miss friends who are no longer around. But it is also a time to renew friendships and make new ones. And when you get right down to it, what could be better than a day outdoors with like-minded company and some cool birds to count?

Port Tobacco Christmas Count
by George Wilmot

Nineteen brave souls showed up to perform the Port Tobacco Christmas Bird Count. One of the most interesting birds seen on the count was the Rufous Hummingbird seen by George Jett and Gwen Brewer and very well documented. Also about 31 Chipping Sparrows were seen - one by Bob Boxwell and 30 by the Sector 6 Team. This sparrow is quite uncommon in the winter. Otherwise the count results were similar to those of the 2001 Port Tobacco Xmas Count.

NEW OR RENEWAL MEMBERSHIP APPLICATION

- Please enroll me as a member of the Audubon Family and the Southern Maryland Audubon Society. I will receive the chapter newsletter, *The Osprey*, and all my dues will support environmental efforts in Southern Maryland. **Make check payable to Southern Maryland Audubon Society.**
- Please enroll me as a member of the National Audubon Society and the local chapter, the Southern Maryland Audubon Society, at the Introductory Offer. I will receive the *Audubon* magazine, the chapter newsletter, *The Osprey*, and support National and local environmental causes. A fraction of my dues will be returned to the local chapter. **Make check payable to National Audubon Society.**
- Please **renew** my membership in the National Audubon Society and the local chapter, the Southern Maryland Audubon Society. A fraction of my dues will be returned to the local chapter. **Make check payable to National Audubon Society.**

FEBRUARY EVENTS

February 5 – Wednesday – 7:30 p.m.

Monthly Meeting

Clearwater Nature Center, Cosca Regional Park,
Prince George's County, Clinton, Maryland

Breeding Bird Atlas: An Update

WALTER ELLISON, *State Atlas Coordinator*

The MD/DC Breeding Bird Atlas project has just entered its second year. Walter Ellison and members of the State Atlas Board will discuss the results of the first year of atlasing in Maryland and D.C. They will discuss the good birds found and the extent of coverage during the first year of field work and present some early conclusions about bird range changes – both gains and losses. The Atlas is a collective effort; come and learn how much the members of the Southern Maryland Audubon Society and other organizations have been able to achieve in the first year of the project.

February 2 - Sunday - 8 a.m.

Field Trip

Indian Creek Natural Resources Management Area, Charles County

“WINTER LAND BIRDS AND WATERFOWL”

Leader: George Jett (301-843-3524). Half day trip. This NRMA contains forest, field, swamp and tidal water habitats. A wide variety of winter birds is expected. Meet in the NRMA parking lot on the south side of Rt. 231 about a mile west of the Patuxent River Bridge at Benedict.

February 17 - Monday - 9 a.m.

Field Trip

Myrtle Point, St. Mary's County

“GREAT BACKYARD BIRD COUNT”

Leader: Bob Boxwell (410-326-2042, ext. 45). Half day trip. Join in this fun and educational event. Diverse habitat should make for an interesting morning. See January Osprey for details. Geared for middle school and older. From Calvert County, take Rt. 4 across the Thomas Johnson Bridge and turn right onto Patuxent Blvd about 2 1/4 miles west of the bridge. From St. Mary's County, take Rt. 4 towards Solomons and turn left onto Patuxent Blvd. Follow to the end and meet in the parking lot on the left where we will divide into teams.

February 26- Wednesday-7:00 p.m.

Board of Director's Meeting

SMECO Office

White Plains, MD

EDITOR: Dean Newman

44328 Ivy Stone Lane, California, MD 20619

Phone Number: (301) 757-9170

E-Mail: rdnewman@erols.com

The deadline for the Osprey is normally the 5th of each month.

Please send all short articles, reports, unique sightings, conservation updates, calendar items, etc., to the above address. If time is a problem, call the number above.
